

<cafe management System>

The Cafe Management System is a web-based application designed to streamline the day-to-day operations of a cafe. The system includes modules for managing orders, inventory, staff, and customer information. The system is also designed to provide valuable insights into customer behavior and preferences, enabling cafe owners to make data-driven decisions to improve their business.

The Cafe Management System has the potential to increase efficiency, reduce errors, and improve customer satisfaction in cafes of all sizes.
